**Remote Keyless Entry CANOPY
ISUZU D-MAX ALL NEW 2020**

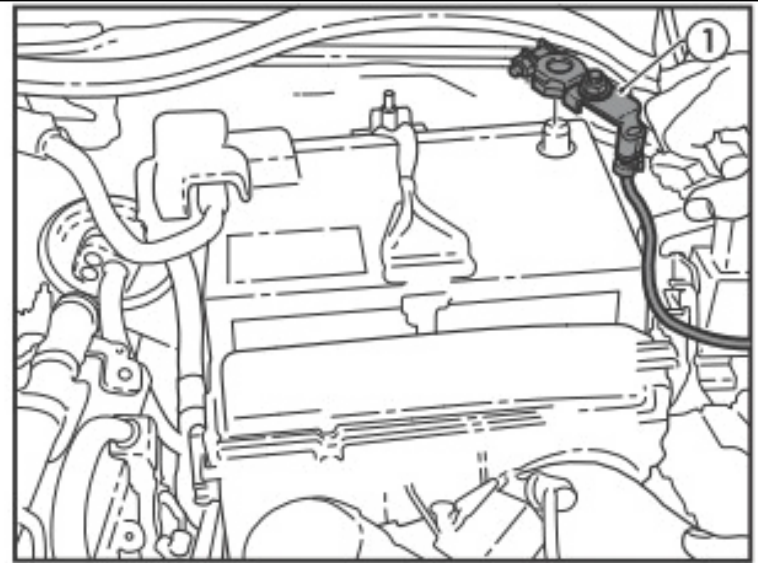

Important

Always refer to the vehicle's Workshop Manual when removing vehicle components.

- Note down all clock and radio settings.
- In the engine bay, disconnect the negative battery terminal (1).

On RG-01 D-MAX, remove the LHS kick panel under the glove box.

Locate LHS door inline connector as shown

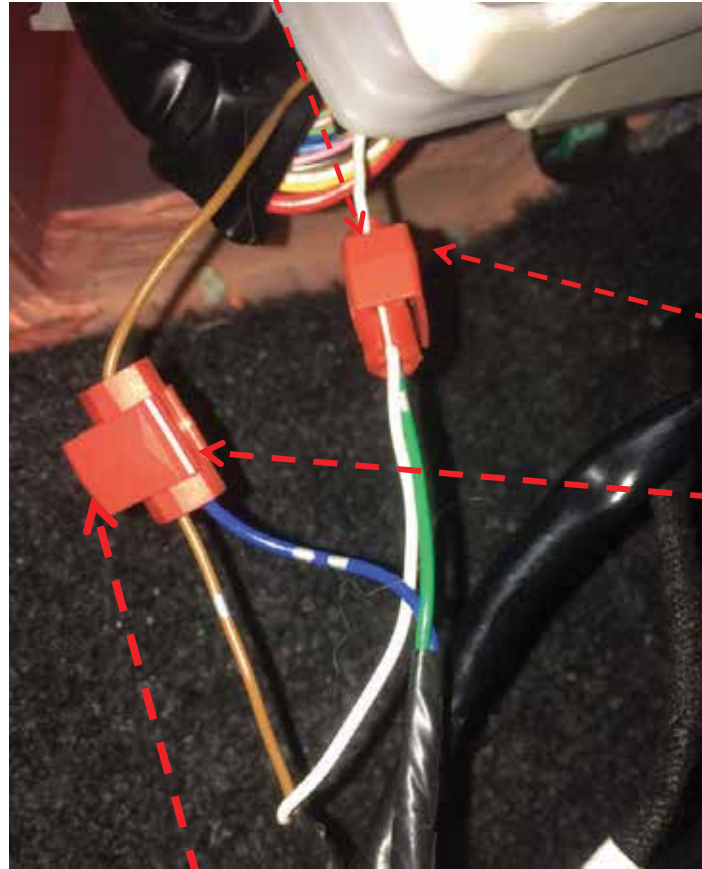

2 Remove the mounting bolt on the connector interface

1 Remove the connector leaver lock & disconnect from the interface.

Once disconnected, turn over the connector interface to access the required circuits.

Locate the **White** wire (top corner cavity) on the green connector for door “UNLOCK” signal. Using the scotch lock on the RKE cabin Harness, connect “UNLOCK” (**GN/BK** wire) as shown.

Locate the **Brown** wire (bottom corner cavity) on the green connector for door “LOCK” signal. Using the scotch lock on the RKE cabin Harness, connect “LOCK” (**BL/BK** wire) as shown.
